PROJECTS

PORFOLIO PROJECT

HTML, CSS, Sass, JavaScript

Current portfolio site styled with Sass and Javascript. Built with a clean, reactive design and a high Lighthouse score.

CV GENERATOR

HTML, CSS, Sass, JavaScript, React

A web application which generates and prints a CV using user entered data, using controlled forms, hooks and a react-to-print API.

WEATHER APP

HTML, CSS, JavaScript, OpenWeather API

A weather app built using vanilla JavaScript that will generate a seven day forecast based on either a location manually entered or the current location using the Geolocation API.

CHAT APP

HTML, CSS, JavaScript, Bootstrap, Node.js, Socket.io API

A chat app built using Node.js, Socket.io API and Bootstrap. Allows communication between remote users in the same chat room.
